

Managed service delivery and custom software for government — one accountable prime.

CORE COMPETENCIES

Managed service delivery

WE MANAGE QUALIFIED PERFORMERS

- ◆ **Contract & subcontract administration** — awards, modifications, invoicing, and reporting with auditable records
- ◆ **Subcontractor sourcing & qualification** — licensure, insurance, and references vetted before work begins
- ◆ **Program management & quality control** — one point of contact plans, inspects, and corrects the work
- ◆ **Labor standards compliance** — Service Contract Act and Davis-Bacon wage determinations applied and documented

Software & digital services

WE BUILD IT DIRECTLY

- ◆ **Custom applications** — purpose-built web and mobile software, designed and shipped end to end
- ◆ **Online intake & workflow** — customer-facing intake and case-flow systems that replace paper and manual routing
- ◆ **Internal line-of-business tools** — applications that streamline operations, records, and reporting
- ◆ **Process & data automation** — automating repetitive processes and moving data cleanly between systems

DIFFERENTIATORS

- ◆ **One accountable prime.** Single point of responsibility across both service delivery and software — the coordination risk sits with us, not the customer.
- ◆ **Veteran-owned.** A Veteran-Owned Small Business, eligible to help agencies meet small-business and veteran goals.
- ◆ **Direct principal access.** You reach the owner directly — no intake queue, no hand-offs.
- ◆ **Nationwide.** We manage contracts in any U.S. state and place performers local to the site; software is delivered remotely nationwide.
